## Introduction to the formulary drug list

The Drug Formulary is a list of medications that are approved by the Food and Drug Administration (FDA) and are selected based on safety, effectiveness, and cost. This list of generic and brand drugs is covered by your health insurance policy under the prescription drug benefit of the policy.

## Definitions

The following words and definitions will be used throughout the formulary drug list.

Brand name drug	A drug that is marketed under a proprietary, trademark protected name. The brand name drug shall be listed in all CAPITAL letters.
Ccoinsurance	A percentage of the cost of a covered health care benefit that an enrollee pays after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.
Copayment	A fixed dollar amount that an enrollee pays for a covered health care benefit after the enrollee has paid the deductible, if a deductible applies to the health care benefit, such as the prescription drug benefit.
Deductible	The amount an enrollee pays for covered health care benefits before the enrollee's health plan begins payment for all or part of the cost of the health care benefit under the terms of the policy.
Drug tier	A group of prescription drugs that corresponds to a specified cost sharing tier in the health plan's prescription drug coverage. The tier in which a prescription drug is placed determines the enrollee's portion of the cost for the drug.
Enrollee	A person enrolled in a health plan who is entitled to receive services from the plan. All references to enrollees in this this formulary template shall also include subscriber as defined in this section below.
Exception request	A request for coverage of a prescription drug. If an enrollee, his or her designee, or prescribing health care provider submits an exception request for coverage of a prescription drug, the health plan must cover the prescription drug when the drug is determined to be medically necessary to treat the enrollee's condition.
Exigent circumstances	Are when an enrollee is suffering from a health condition that may seriously jeopardize the enrollee's life, health, or ability to regain maximum function, or when an enrollee is undergoing a current course of treatment using a non-formulary drug.
Formulary	The complete list of drugs preferred for use and eligible for coverage under a health plan product, and includes all drugs covered under the outpatient prescription drug benefit of the health plan product. Formulary is also known as a prescription drug list.
Generic drug	The same drug as its brand name equivalent in dosage, safety, strength, how it is taken, quality, performance, and intended use. A generic drug is listed in bold and italicized lowercase letters.
Non-formulary drug	A prescription drug that is not listed on the health plan's formulary.
Out-of-pocket costs	Are copayments, coinsurance, and the applicable deductible, plus all costs for health care services that are not covered by the health plan.

Prescribing provider	A health care provider authorized to write a prescription to treat a medical condition for a health plan enrollee.
Prescription	An oral, written, or electronic order by a prescribing provider for a specific enrollee that contains the name of the prescription drug, the quantity of the prescribed drug, the date of issue, the name and contact information of the prescribing provider, the signature of the prescribing provider if the prescription is in writing, and if requested by the enrollee, the medical condition or purpose for which the drug is being prescribed.
Prescription drug	A drug that is prescribed by the enrollee's prescribing provider and requires a prescription under applicable law.
Prior authorization	Health plan's requirement that the enrollee or the enrollee's prescribing provider obtain the health plan's authorization for a prescription drug before the health plan will cover the drug. The health plan shall grant a prior authorization when it is medically necessary for the enrollee to obtain the drug.
Quantity limit	Restriction on the number of doses or any other limitations on the quantity of a prescription drug a health plan will cover during a specific time period.
Step therapy	A process specifying the sequence in which different prescription drugs for a given medical condition and medically appropriate for a particular patient are prescribed. The health plan may require the enrollee to try one or more drugs to treat the enrollee's medical condition before the health plan will cover a particular drug for the condition pursuant to a step therapy request. If the enrollee's prescribing provider submits a request for step therapy exception, the health plans shall make exceptions to step therapy when the criteria is met.
Subscriber	The person who is responsible for payment to a plan or whose employment or other status, exception for family dependency, is the basis for eligibility for membership in the plan.

### How do I find a drug on this list?

The drugs are listed alphabetically under the column titled "Prescription Drug Name" by its brand or generic name under the therapeutic category and class to which it belongs. You can search this list using the brand or generic name of the drug by:

- Searching for the category or class to which the drug belongs and search for the name of the drug in alphabetical order or
- Searching the Alphabetical Index of Drugs by the name of the drug.

If a generic equivalent for a brand name drug is not available or is not covered, the drug will not be separately listed by its generic name.

Listing a drug on the formulary does not guarantee that it will be prescribed by your doctor or prescriber.

### How do I know if the drug listed is a brand or generic drug?

- A generic name drug for a brand name drug is listed in all lowercase bold italics

- A brand name drug is listed in all CAPITALS
  - The brand name may be listed in parenthesis after the generic name for reference only
- If a generic equivalent for a brand name drug and the brand name drug are both available and covered, the generic drug will be listed separately from the brand name drug in all lowercase bold italics

Example

Drug type	How the drug name will appear in the formulary
Brand drug	LIPITOR
Generic drug	<b><i>atorvastatin calcium</i></b>
Generic drug with a brand name reference	<b><i>atorvastatin calcium</i></b> (Lipitor)

### What are drug tiers?

Drugs are placed into drug tiers based on defined categories. The amount you pay for drugs in different tiers will vary. You can find information about what you pay by drug tier in the Summary of Benefits of your Evidence of Coverage (EOC).

The column titled “Drug Tier” is the cost level you pay for a drug.

Drug Tier	Description
1	Most generic drugs or low-cost preferred brand drugs
2	Non-preferred generic drugs, preferred brand drugs, or drugs recommended by the P&T Committee based on drug safety, efficacy, and cost
3	Non-preferred brand drugs; drugs recommended by the P&T Committee based on safety, efficacy, and cost; or drugs that generally have a preferred and often less costly therapeutic alternative at a lower tier
4	Drugs the FDA or drug manufacturer requires to be distributed by specialty pharmacies; drugs that require training or clinical monitoring for self-administration; or drugs with a plan cost (net of rebates) greater than \$600 for a one- month supply

There is a maximum limit on the copayment/coinsurance amount for orally administered anti-cancer drugs. Please see your Summary of Benefits or contact Chinese Community Health Plan Member Services at 1-888-775-7888 or, for TTY users, 1-877-681-8898, seven days a week from 8:00 a.m. to 8:00 p.m. for more detailed information.

### How to read the formulary

The column titled “Coverage Requirements and Limits” identifies coverage restrictions or limits for drugs when applicable.

Coverage Requirements and Limits	Description
Age Limit (AGE)	The prescription is covered when certain age criteria are met.
Contraception (CT)	Contraceptive drugs and devices are covered at \$0 when specific criteria are met.
Diabetic Drugs, Equipment, and Supplies (DD)	Drugs, equipment, and supplies for the management and treatment of insulin-using diabetes, non-insulin-using diabetes, and gestational diabetes

Gender Limit (GL)	Prior authorization may be required if the FDA, manufacturer, or treatment guidelines do not recommend the drug for a gender.
Oral Anti-Cancer (OCH)	There is a maximum limit on the copayment/coinsurance amount for orally administered anti-cancer drugs.
Preventative Health (EHB)	Affordable Care Act (ACA) preventive health drugs, which are covered at \$0 when specific criteria are met.
Specialty Pharmacy (SP)	These drugs are available exclusively through select specialty pharmacies.
Prescriber Restriction (PR)	The prescription is covered when prescribed by certain providers.
Prior Authorization (PA)	Prior authorization is required to determine coverage.
Quantity Limit (QL)	The prescription quantity covered is limited. A prior authorization request for quantity exception is required for amounts greater than the limit.
Step Therapy (ST)	If a drug is subject to step therapy, you may have to try one or more other drugs before your health insurance policy will cover that drug for your medical condition

### **How often will the formulary change?**

This formulary is subject to change monthly. Formulary changes that may not have prior notice include the following:

- A brand name drug may be moved to a higher tier or removed from the formulary if a new generic drug is added to the formulary,
- A drug may be removed from the formulary when it is removed from the market because the Food and Drug Administration (FDA) deems a drug to be unsafe or the drug's manufacturer removes the drug from the market, or
- A drug is added to the formulary, moved to a lower tier, or has a utilization management requirement removed.

When a drug or dosage form is removed from the formulary and a drug was previously approved for coverage for your medical condition, coverage for the drug will continue if your provider continues to prescribe the drug for your condition and the drug is prescribed appropriately and is safe and effective for your condition.

### **What is a medical benefit drug versus a drug covered under the Outpatient Prescription Drug Benefit?**

A medical benefit drug is a drug that is not generally self-administered and administered by a health care professional. The outpatient prescription drug benefit includes FDA-approved drugs that are self-administered, commonly oral or self-injectable drugs, not otherwise excluded from coverage.

### **What are preventive health drugs?**

Preventive health drugs are select drugs required by health reform legislation to be covered at no charge to the insured. Preventive health drugs are determined based on evidence-based recommendations by the United States Preventive Services Task Force. For more details about preventive health drugs, please contact Chinese Community Health Plan Member Services at 1-888-775-7888 or, for TTY users, 1-877-681-8898, seven days a week from 8:00 a.m. to 8:00 p.m.

### **What is a contraceptive drug or device?**

Contraceptives are drugs or devices, such as diaphragms or cervical caps, that help prevent pregnancy.

Most generic drug contraceptives and contraceptive devices are covered at no charge to the insured.

### **What diabetes care drugs and products are covered under the Outpatient Prescription Drug Benefit?**

FDA-approved drugs for the treatment of diabetes are included in the formulary drug list. Diabetic testing supplies such as blood glucose test strips, urine test strips, lancets, insulin syringes/pens covered under the Outpatient Prescription Drug Benefit are also included in the formulary drug list.

### **What if your drug is covered under the medical benefit?**

A prescription drugs may be covered under the medical benefit and are not listed in this drug formulary. You should contact the Member Services Center at 1-415-834-2118 to ensure that the drug may be covered under the medical benefit. If the Member Services Center confirms that we may cover your drug under the medical benefit, you, your representative, or your doctor may submit a Service Authorization Request to the Chinese Community Health Plan Utilization Management Department.

### **What is step therapy?**

Step therapy means a specific sequence in which prescription drugs for a particular medical condition must be tried. If a drug is subject to step therapy in this formulary, you may have to try one or more other drugs before your health insurance policy will cover that drug for your medical condition.

Step therapy requirements are based on how the FDA recommends that a drug should be used, nationally recognized treatment guidelines, medical studies, information from the drug manufacturer, and the relative cost of treatment for a condition. Your provider may submit a request for an exception to the step therapy requirement.

To request an exception, please contact Chinese Community Health Plan Member Services at 1-888-775-7888 or, for TTY users, 1-877-681-8898, seven days a week from 8:00 a.m. to 8:00 p.m. You, your representative, or your doctor may submit an exception request.

### **What is the prior authorization/exception request process?**

Drug prior authorization involves getting advance approval of coverage for a prescription medication based on medical necessity. Some drugs require review of the patient's prescription and medical history to determine coverage.

The exception process involves requesting coverage of a non-formulary drug. A formulary exception, which allows coverage of a non-formulary drug is based on medical necessity.

To request prior authorization or a non-formulary coverage exception, please contact Chinese Community Health Plan Member Services at 1-888-775-7888 or, for TTY users, 1-877-681-8898, seven days a week from 8:00 a.m. to 8:00 p.m. You, your representative, or your doctor may submit an exception request.

Once we receive all the needed supporting information, we will approve or deny the exception request based on medical necessity within 72 hours for non-urgent requests, or within 24 hours in urgent or exigent circumstances. If Chinese Community Health Plan denies a request for prior authorization or an exception request, the member, an authorized representative, or the provider can file an appeal/grievance with Chinese Community Health Plan, as described in the “Grievance Process” section of the EOC.

### **Participating retail pharmacies**

You can fill prescriptions at any participating (network) pharmacy, unless it is a prescription for a specialty drug. Chinese Community Health Plan contracts with a wide network of retail pharmacies. To find a network pharmacy, visit <https://cchphealthplan.com/family-member> or contact Chinese Community Health Plan Member Services at 1-888-775-7888 or, for TTY users, 1-877-681-8898, seven days a week from 8:00 a.m. to 8:00 p.m. for assistance.

### **What are specialty drugs?**

Specialty drugs are drugs that may require coordination of care, close monitoring, or extensive patient training for self-administration. These requirements generally cannot be met by a retail pharmacy. Specialty drugs may also require special handling or manufacturing processes (such as biotechnology), restriction to certain physicians or pharmacies, or reporting of certain clinical events to the FDA. Specialty drugs are usually high cost.

Specialty drugs may require prior authorization for medical necessity by Chinese Community Health Plan. Most specialty drugs are available exclusively from a Network Specialty Pharmacy. If coverage is approved, a Network Specialty Pharmacy can provide specialty drugs by mail or, upon your request, can transfer the specialty drug to an associated retail store for pickup. If you have questions about specialty drugs, please contact Chinese Community Health Plan Member Services at 1-888-775-7888 or, for TTY users, 1-877-681-8898, seven days a week from 8:00 a.m. to 8:00 p.m.

### **Mail order pharmacy**

Chinese Community Health Plan offers an easy-to-use mail service prescription drug program through our contracted mail service pharmacy. You can save time and money using the mail service drug program. It can be a convenient way to fill maintenance medications for up to a 90-day supply. Maintenance medications are drugs that doctors prescribe on an ongoing, regular basis to maintain health. For more information on using the mail service prescription benefit, please contact Chinese Community Health Plan Member Services at 1-888-775-7888 or, for TTY users, 1-877-681-8898, seven days a week from 8:00 a.m. to 8:00 p.m.

### **What if your drug is not on the formulary?**

If your prescription is not listed on the formulary, you should first contact the Member Services Center at 1-415-834-2118 to ensure that the drug is not covered under the outpatient prescription drug benefit. If the Member Services Center confirms that we do not cover your drug under the pharmacy benefit, you have three options:

- 1) You can ask your doctor if you can switch to another drug covered by us.
- 2) You can ask us to make an authorization to cover your drug.

- 3) You can pay-out-of-pocket for the drug and request that the Plan reimburse you by requesting an authorization. If the authorization request is not approved, the Plan is not obligated to reimburse you. If the authorization request is not approved, you may appeal the Plan's denial.

You can obtain non-formulary prescription drugs (those not listed on our drug formulary for your condition) if authorized by the Plan and a CCHP physician determines that they are medically necessary. If you disagree with your physician's determination that a non-formulary prescription drug is not medically necessary, you may file a grievance as described in the "Grievances and Appeals Process" section of your Evidence of Coverage booklet.
