

2022 Pediatric dental Essential health benefits

Small Group (2-100)

All our Small Group health plans include pediatric dental essential health benefits (EHBs), which provide important coverage for kids up to age 19. Benefits include preventive care, fillings, and more extensive services like medically necessary orthodontia. You pay the least when you choose a dentist in the Dental Prime network.

Preferred provider organization (PPO) health plan coverage allows you to see dentists in the plan's network or outside the plan's network. Health maintenance organization (HMO) health plan coverage is for dentists within the plan's network.

	In-network and out-of-network
Diagnostic and preventive services (cleanings, exams, and X-rays) – not subject to deductible	100% coinsurance
Basic services (fillings)	50% coinsurance
Endodontic, periodontal, oral surgery, and major services	50% coinsurance
Medically necessary orthodontia	50% coinsurance

Because these benefits are part of your health plan, they share a combined out-of-pocket maximum. Diagnostic and preventive services, like cleanings, exams, and X-rays, are not subject to the deductible, so you or your children can take advantage of them right away. These benefits have no annual maximum.

▶ **For more information** on your benefits or to find care, visit [anthem.com/ca](https://www.anthem.com/ca) or download the SydneySM Health mobile app.

Sydney Health is offered through an arrangement with Carelon Digital Platforms, a separate company offering mobile application services on behalf of Anthem Blue Cross ©2020-2022.
