

# Estimate costs

Surprises are for parties,  
not dental costs

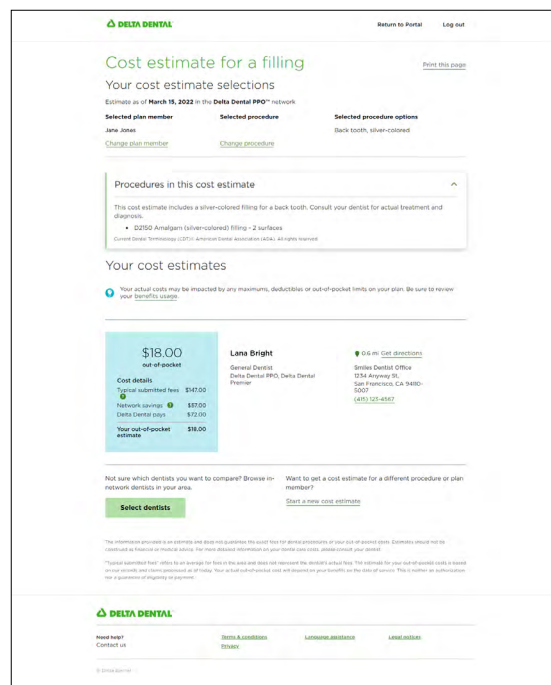

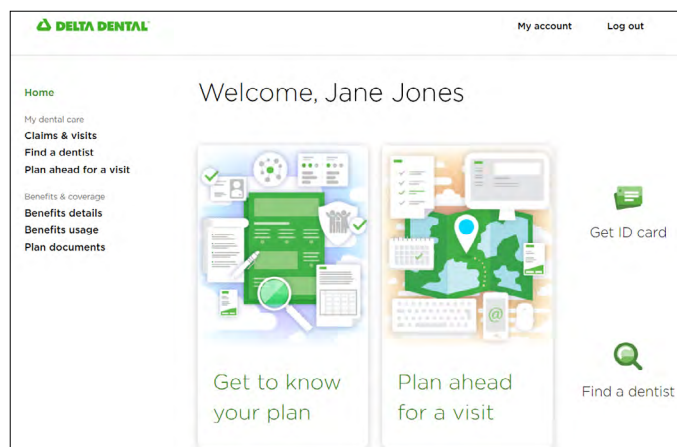

No one should experience sticker shock after receiving dental care — that's why Delta Dental created a tool that allows members to estimate the cost of their visit before they see the dentist.

The Cost Estimator shows the projected cost of an entire dentist visit, rather than just a single procedure, which can help members plan dental treatment with more confidence.

Members can use this tool to select multiple dentists, both in and out of network, to compare costs and look for savings.

Help your members plan dental treatment with confidence! Here's how to get started!

It's easy to use! Members simply log in at [deltadentalins.com](https://deltadentalins.com) and click **Plan ahead for a visit** to get started.

## By asking guiding questions, the tool offers:

- A cost estimate for a dentist visit based on current eligibility for various procedures like checkups, fillings and crowns
- A snapshot of typical submitted fees, the member's typical costs and potential network savings

## It helps groups and members

The tool helps members make sense of their dental care. It can help you, too, by:

- Increasing cost transparency can help reduce questions and confusion about network dentists
- Showing clear cost differences between network and non-network dentists encourages in-network utilization — which can help keep your dental plan costs stable
