

Medicare Part D Creditable Coverage

A benefit plan's prescription drug coverage is considered creditable if the actuarial value of the plan's prescription drug coverage – i.e., the percentage of a member's total average cost that the plan is expected to cover – meets or exceeds the actuarial value of standard prescription drug coverage under Medicare Part D. Employer sponsored plans that include prescription drug coverage are required to disclose to 1) CMS and 2) members who are Medicare beneficiaries or Medicare-eligible, whether their plan's prescription drug coverage is creditable or not.
